EDUCATION

Bachelor of Science, Business Information Systems

University of South Florida, St. Petersburg, FL • Anticipated Graduation: December 2026 • GPA: 3.4

Relevant Coursework: Business Analytics, Database Management, Information Systems, Data Visualization, Systems Analysis & Design, Statistics for Business

PROFESSIONAL EXPERIENCE

Business Analyst Intern — Veradigm, Connect Team

Remote • June 2026 – Present

- Built a four-tab analytics dashboard for the Veradigm Connect partner program on 3,000+ verified source records (300 certifications, 2,561 client activation requests, 234 subscription accounts), with record-level drill-down and CSV export on every metric, reconciled field-by-field against source workbooks
- Analyzed 11,383 developer-portal support tickets across 718 vendors to baseline three key results for a support-reduction OKR — established that the top 25 vendors drove 49% of ticket volume and modeled a 47.5% self-service deflection ceiling against industry benchmarks
- Cross-referenced a 512-account Legal aging report against ~9,400 vendor records under a same-day deadline, delivering 26 verified matches classified by partner license status while excluding low-confidence matches to avoid false positives
- Owned interface design and alert routing for a four-person team's EHR data-quality dashboard, presented to senior leadership at the company's internal innovation challenge

Pharmacy Technician — Walmart Pharmacy

Bradenton, FL • June 2025 – Present

- Performed high-volume data entry, validation, and transaction processing within enterprise healthcare systems
- Analyzed prescription and operational data to support workflow efficiency and error reduction during peak periods
- Used POS and healthcare information systems to track patient, inventory, and operational metrics while maintaining compliance

Pharmacy Technician — CVS Pharmacy

Palmetto, FL • August 2022 – June 2025

- Managed patient data and insurance claims in pharmacy systems with a high degree of accuracy and confidentiality; trained new team members on digital prescription workflows

Volunteer Data Analyst — Turning Points Homeless Shelter

Bradenton, FL • January 2022 – January 2023

- Cleaned, validated, and reconciled datasets to improve reporting accuracy and data reliability
- Analyzed service utilization and outcome data to identify trends supporting program evaluation and grant reporting

PROJECTS

Global Career Accelerator, University of South Florida (Jan–May 2026) — Built Tableau dashboards and Excel models across a dozen public datasets (YouTube trending video performance, NYC taxi fares, BART ridership, Super Bowl advertising) using calculated fields, PivotTables, and XLOOKUP to surface behavioral and distribution patterns.

SKILLS

Data & Technology: Advanced Excel (PivotTables, XLOOKUP/VLOOKUP, SUMIFS), SQL (SELECT, WHERE, JOIN), Tableau, Power BI, Python, JavaScript (basic), HTML/CSS, POS & Enterprise Healthcare Information Systems
